SOFTWARE ENGINEER | REACT / FULL-STACK

Software engineer with 4 years of professional experience at Accenture building and supporting production applications, with a strong focus on React and full-stack web development. Experienced with React, JavaScript/TypeScript, Java, Node.js, REST APIs, SQL, Agile delivery, production debugging, and enterprise-scale applications. Also independently built and deployed a production React application from concept to launch, strengthening hands-on experience across the full development lifecycle.

TECHNICAL SKILLS

- **Frontend:** React 18, ReactJS, JavaScript, TypeScript, React Router, Redux, TanStack React Query, Vite, Tailwind CSS, shadcn/ui
- **Backend:** Java, Node.js, TypeScript/Deno, RESTful APIs, serverless functions
- **Data & Cloud:** MySQL, PostgreSQL, Oracle, AWS, Firebase, JSON data modeling
- **Engineering:** Git, Jira, ServiceNow, CI/CD, SonarQube, Eclipse, IntelliJ IDEA, VS Code, Splunk, testing, production debugging
- **Security:** Secure coding, code review, vulnerability remediation, data privacy and access controls

PROFESSIONAL EXPERIENCE

SWAP4WORK | San Francisco Bay Area, California **January 2026 - Present**
Founder & Full Stack Developer

- Architected and independently developed a **production full-stack marketplace** from concept through deployment, using **React 18, TypeScript, Vite, React Router, and modern component-based UI patterns**.
- Built responsive, reusable interfaces with **Tailwind CSS and shadcn/ui**, implementing **complex user workflows** including listings, negotiations, agreements, milestones, time logging, ratings, reporting, and user blocking.
- Designed **backend data models and workflows** and developed **TypeScript/Deno serverless functions**, authentication, email verification, access controls, notifications, and location-based functionality.
- Use **AI-assisted development** to accelerate implementation, debugging, refactoring, and feature iteration while reviewing generated code, validating behavior, and handling edge cases.

ACCENTURE |San Francisco, California **February 2022 - November 2025**
Application Developer Analyst |June 2023 - November 2025

- Engineered and optimized **backend and frontend features** for a statewide case-management system used by **58 California counties** and serving **millions of residents**, enhancing **reliability** and **maintainability** using **Java, JSP, and ReactJS**.
- Improved **system stability** and **code quality** by leveraging **Eclipse, Splunk, SonarLint, SonarQube, and Git** to streamline **debugging, testing, and continuous development** across a large-scale application.
- Collaborated in **Agile teams** of 50+ engineers using **Jira** and **ServiceNow**, managing ~**30 incidents weekly**, and resolving **50+ code and data defects** per sprint to ensure on-time delivery.
- Delivered a **major portal feature** and numerous bug fixes, enhancing **system performance, usability, and production stability** across production environments for thousands of end users.
- Managed large volume of **sensitive data** in **MySQL databases**, implementing **secure access protocols** and **ensuring** full **compliance** with organizational and state-level security standards.
- Developed and executed **dozens of unit, assembly, and mock tests per release cycle** to validate core functionality and maintain system integrity across multiple application modules.

Application Developer Associate | January 2022 - May 2023

- Contributed to various **internal Machine Learning initiatives**, developing a **full-stack application** with a team of 4 developers using **ReactJS** and **Python**.
- Served as a **Full Stack Developer** for a **movie industry client**, building a **responsive and dynamic web application** using **ReactJS** in an **Agile environment** with over 10 developers.
- Identified and remediated a high volume of **security vulnerabilities** for a **major social media client**, becoming the team's top code reviewer and partnering closely with developers across multiple languages to enforce secure coding standards.

HOSPITALITY INDUSTRY | Worldwide **January 2007 - December 2020**

Server, Management & Leadership

- **Led high-volume restaurant operations** and teams of up to 30 employees, overseeing hiring, training, scheduling, customer experience, vendor relationships, and cost control.
- **Increased sales by approximately 20%** while maintaining service and operational standards.
- **Managed teams and operations** across France, Florida, California and Qatar, adapting quickly to different business environments, regulations, and customer expectations.

EDUCATION

- **Full Stack Web Development, Ruby on Rails, JavaScript** **November 2020 - April 2021**

Flatiron School, Online

- **Bachelor in Hospitality & Catering Management** **September 2007 - June 2009**

Grenoble, France

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** **February 2022 - November 2025**

HOBBIES & INTERESTS

- 10k runner, mountain biker, soccer player.
- Volunteer at a food bank with Una Vida Petaluma.
- Volunteer with Petaluma Active 2030 raising funds for kids to go back to school.
- Volunteer soccer coach for toddlers.
